31 Mertz Avenue
Hillside, N. J.

To Our Dahlia Loving Friends and Customers:

In presenting our latest catalog we wish to again express our appreciation for your valued patronage and support, and to thank you for your gratifying letters telling of successes with the roots and plants purchased of us.

We use our best efforts to keep our stock absolutely healthy and free from disease by the destruction of "runts" or "stunts" and by discarding those that do not come true.

We have kept our list of varieties limited by retaining a very high percentage of those that are placed on the "Honor Roll" consecutive seasons.

The varieties mentioned herein are of exceptional merit and **may be grown to Your Complete Satisfaction**, if you will **Dig Deep, Cultivate Regularly and Keep Insects Under Control**, particularly the leaf hopper.

(For spraying we use "Evergreen" or "Red Arrow.")

READ CAREFULLY

Owing to the abnormal conditions we have lowered prices and are making further concessions, i.e., on retail orders amounting to \$5.00 to \$10.00, you may select **20% in additional stock free**; over \$10.00, **25% free**.

Terms. Cash with order or 25% deposit, balance at shipping time. Orders over \$1.00 sent prepaid. In ordering green plants to be shipped further than 1st zone, add 25 cents for **Special Delivery** to insure plants arriving in good growing condition. We pay all other charges.

Shipments. Roots, May 1st to June 1st. Plants, May 15th to June 10th.

Guarantee. All stock sent out in first class growing condition, guaranteed to be healthy and true to name and to grow if cared for on arrival and after planting and that all not proving such will be cheerfully replaced upon word from the purchaser.

PREMIER DAHLIA GARDENS

Notify us immediately if anything is unsatisfactory when received or if root does not start to grow within three weeks after planting. Our roots are field grown, in soil treated with Potash, for the production of exhibition blooms.

—————:O:—————

OUR SQUARE DEALINGS HAVE BEEN COMMENDED BY ALL

—————:O:—————

Canadian Customers. Arrange for the importation of Nursery Stock from the United States with the Secretary of the Destructive Insect and Pest Act Advisory Board, Dept. of Agriculture, Ottawa, and file the permit with the Collector of Customs so shipments may be cleared, sending the number of the permit to us that we may place it on the shipment. Owing to the extra hazards caused by inspections, repacking and delays, we cannot guarantee safe delivery of plants. The delivery of roots proving far more satisfactory.

Order Early to avoid disappointment, as orders are filled in rotation. The stock of some of the varieties is limited.

Sincerely yours,

GEORGE H. SWEZEY

PREMIER DAHLIA GARDENS

JOIN THE AMERICAN DAHLIA SOCIETY

If you are not a member of this great Society you should join by all means. The dues are only \$2.00 the year, which entitles the members to the Bulletin free. The vast amount of useful information published in each issue of the Bulletin is worth many times \$2.00 to any Dahlia grower.

Mr. C. Louis Alling, West Haven, Conn., is Secretary.

1933 INTRODUCTIONS

AMELIA EARHART (Cordes-Eastman)—The outstanding dahlia of the year. One of the largest dahlias grown, 13x8. The formation and color are most artistic. Semi-Cactus, Apricot Buff, base of petals primrose. Winner of Am. Home Achievement Medal at N. Y. and Baltimore. Winner in seedling classes at Atlantic City, Baltimore, N. Y., Bryn Mawr, Washington, Richmond and Los Angeles. Won largest flower class at Baltimore and Washington. **Plants \$7.50.**

CAMEO (F. & M. No. 5)—An Informal Decorative of true coral pink with the color deepening towards the center; petals are overlaid with a glistening golden sheen, reverse of petals a deep rose pink making it extremely beautiful. With field grown blooms it was runner up at the three largest Eastern shows for the Achievement Medal. At Bryn Mawr it was awarded a special prize (silver medal) for its beauty and size. If you want to reserve Cameo and early order is advisable. **Plants \$5.00.**

FLORENCE LOUISE (Ostrander)—An extremely large I.D. of pale sulphur yellow, each petal serrated, giving deep and thick appearance to flower, blooms freely. Winner in class for largest dahlia at Atlantic City and at A. D. S. show in N. Y. City. **Roots \$12.00; Plants \$6.00.**

JANE DEW (Dew-Ruschmohr)—A magnificent true, clear pink I D that will rank with the best, the large blooms are very attractive. **Plants \$5.00.**

JANE DIXON (F. & M.)—Formal decorative of a lovely shade of salmon orange, an exhibition dahlia of great depth. A true Autumn shade with reverse a coral color: petals pointed, stems long, stiff and straight, dark green insect resisting foliage. **Plants \$5.00.**

LaFIESTA (Cordes-Eastman)—Another monster of a distinctive new type; I D, having the appearance of a hugh chrysanthemum. Color, butter yellow, penciled red, 12x8. Perfect growth. Winner Am. Home Achievement Medal, Los Angeles, 1931. Winner in seedling classes, 1932, at New York, Camden and Richmond. **Plants \$5.00.**

MONMOUTH GENERAL (Kemp.)—I D A novelty of distinctive new shade of color described by Mr. Derrill W. Hart as bright henna, somewhat the same tone as F. W. Fellows, terra cotta

P R E M I E R D A H L I A G A R D E N S

at center, large, full petaled and of great beauty. On "Honor Roll." Plants \$5.00.

MONMOUTH PENNANT (Kemp.)—I D Here is a bi-color whose flashy combination of orange-scarlet and white attracts immediate attention and is outstanding. Plants \$3.75.

PASTEL GLOW (Artland-Ruschmohr)—I D The transparent dahlia. Color, white with mallow purple reverse showing thru. Beautiful and alluring. Plants \$5.00.

SANHICAN'S SUNSHINE (F. & M.)—S C An exhibition dahlia of clear bright yellow with the outer row of petals showing a faint tinge of bronze. Early and free bloomer, the large flowers are carried well above the foliage on straight stiff stems; petals quilled. Should replace Ambassador which it greatly resembles. Plants \$3.75.

KEMP'S WHITE WONDER—I D This sensational white dahlia is a seedling of Ft. Monmouth. The giant blooms are pure white with long twisted and curled petals; many blooms, measure 12 inches across by 8 to 9 inches in depth. Stems stiff and erect. Foliage thick and leathery like and very resistant to injury from insect attacks; good root maker. Plants \$7.50.

PREMIER DAHLIA GARDENS

MINIATURES OR CHARM DAHLIAS

Considerable interest is being shown in the Miniature types and we are therefore including in this catalog four Honor Roll Miniatures, one of which is a 1933 introduction. Bushes average 2½ to 3 feet.

Roots Plants

MT. WHITNEY SUNSET, (Frame) —1933 introduction. This miniature decorative received a Certificate of Merit at the Trial Grounds at Storrs, Conn., in 1931. A prolific bloomer, lovely color. A gem whether in the garden, exhibition hall, or in home decoration. Mt. Whitney Sunset is a 100 per cent winner.	1.00	
AGALIA —Orange fawn overlaid salmon, very fine.	1.00	.50
LITTLE JEWEL, (Min. F D) —Bloom 2x1. Color is a pleasing peach blossom pink. Exceptionally fine cut flower especially for decorations.50	.25
PINK PEARL—MIN. PEONY OR CHARM DAHLIA —Lovely rose pink, showing a golden disc. Petals are waved and twist like an aster flower. Plants about 3 feet tall, always covered with blooms.	1.00	.50
Special—One each of the above 4 varieties for \$1.75		

:O:

EARLY FLOWERING HARDY CHRYSANTHEMUMS

The varieties we supply are perfectly hardy provided they are not water soaked all winter or frozen by lying in ice that has formed about them. They should be given a slight protection of dry leaves, straw, pine needles or peat and if in well drained soil will survive without any losses. They should be divided in the spring so that one shoot remains to make the future plant. Open flowers are injured by the severe frosts, but the unopened buds are unharmed and flowers may be enjoyed long after the Dahlia blooms are gone.

We offer plants from 2½ in. pots at greatly reduced costs, giving an opportunity to secure choice collections carefully balanced in colors of white, pink, amber, orange, yellow and others.

Six plants for	\$1.00
Fifteen plants for	2.00
One hundred plants for	10.00

Used in conjunction with Dahlias they make a most glorious fall garden.

PREMIER DAHLIA GARDENS

Geo. H. Swezey

31 Mertz Ave., Hillside, N. J.

HOW TO GROW GIANT DAHLIAS

Dahlias are easily grown, requiring no special skill to bring them to perfection.

They prefer a sunny location but do well in partial shade but should not be planted near large trees.

They grow best in light, porous soil having good drainage. Sand, pulverized wall plaster, or fine coal ashes should be added to lighten heavy clayey soils.

If manure is used it should be well rotted (best applied in the Fall) and thoroughly mixed with the soil which should be dug deep (12 to 18 inches).

A green cover crop of Winter Rye planted in the Fall and turned under in the Spring will add valuable humus to the soil. If the ground is worked over early in the Spring, good results will be obtained by planting a cover of Oats and Canadian Field Peas. Green cover crops should not be permitted to grow tall and harden and should be turned under when about 12 inches high. They will then rot in from two to three weeks without loss of their benefits. About a week before planting time broadcast and spade under, commercial fertilizer of 4 per cent nitrogen, 8 per cent phosphoric acid and 6 per cent potash, (advertised as 4-8-6). Five pound should cover approximately 200 square feet.

Dahlias may be planted from May 1st to July 1st, but in this locality June 1st to June 15th is best. They should be planted three feet apart in rows and the rows should be at least three feet apart, four feet or more is better if room is available.

Drive a stake to support each plant. The stake should be four or five feet above ground.

Never plant clumps, but separate the tubers, planting only one in each hole, being sure they have a growing eye. Lay tuber flat with eye up and two or three inches from the stake and about six inches deep. Cover two inches with pulverized soil gradually filling to level as plant progresses. Keep the top soil finely pulverized at all times by cultivating frequently; never allow it to harden.

Watch for cut worms and protect plants from same by placing a ring of roof paper cut three and one-half inches high about the plant. If plant does not do well examine it closely and if it contains a stalk borer a small hole will be found in the side. Squirt a few drops of a mild solution of Black Leaf 40 in the hole. If the plant does not improve in a few days cut back the plant until you find the borer. Shade the plant from direct rays of sun for two or three days and it will in all probability make a quick

recovery and a healthy growth. If troubled with Aphis or Leaf Hoppers spray with "Evergreen" or "Red Arrow." Red Spider may be controlled by spraying foliage with hose.

Some growers make compact bushes of their plants by pinching out the top when three sets of leaves appear.

Never allow more than one or two stalks to grow (the flowers will be finer if only one is permitted), pull out all others.

Tie plants to stakes securely as they grow in height.

When buds appear scrape away enough earth and put in a trowel full of sheep manure, replace the earth and water with two or three pails of water. Repeat every two weeks and wonderful blooms may be had.

Stop cultivation and give plenty of water when flowers appear. A thorough wetting of the soil once a week will improve the blooms extensively. Disbud for large blooms by removing the two side buds, leaving main bud on each shoot; also remove the laterals below this bud to the third or fourth set, this will make long stems to your blooms.

After the frost kills the plants, dig carefully so the necks of the tubers will not be broken; cut back the stalks to three or four inches, turn down to permit to drain; dry in sun three or four hours and place (stems down) in paper lined boxes or barrels covering with paper, bags or carpet. Dry, clean sand or dried peat is also used successfully for storage. Keep in cool, dry place and examine from time to time. Do not permit them to dry out and remove decay or mold if found.

In Spring, when eyes have developed, divide clumps with sharp knife or shears, leaving eye to each tuber.
